Customer Voice

### Introduction

The office of the United Arab Emirates Ministry of Economy located in the Liwa Tower in Abu Dhabi is responsible for preparing the general development plan of the state. This is a complex and important task that requires lighting fit for focus and deliberation.

### The Lighting Challenge

The lighting needed to fit in seamlessly with the interior design style of the UAE Ministry of Economy. Light is an integral complement to the architecture of the space and should offer a comfortable environment for productive, focused work. OPPLE designed a special black lamp ring to ensure the OPPLE LED Spot Grille High Quality luminaires integrated smoothly with the industrial interior design of the building. The lighting solution must enable people to perform their best by offering comfortable ambient light.

### Benefits

OPPLE was flexible in meeting the design needs of the project and was able to create the lamp ring color in just 8 weeks for 1700pcs LED luminaires. By remaining nimble and investing in research and development OPPLE has positioned itself as one of the fastest and most effective manufacturers in the lighting industry. OPPLE's LED Spot Grid High Quality luminaires have a 30,000-hour lifespan and offer up to 80% energy savings compared to halogen spotlights.
